

PLAY TO EARN - ECONOMIC BLOCKCHAIN GAME WITH EARNINGS UP TO 2% PER DAY

HONEYPOT GAME – IN HONEY WE TRUST

YOU STILL DO NOT KNOW

ABOUT HONEYPOT GAME?

An economic blockchain game based on smart contracts, which aims to create a stable and secure financial instrument for everyone.

WE OFFER YOU:

Honey profit up
to 60% per
month

Profitable NFT

High safety of your
finance

Multi-level
affiliate program

Safety and
integrity of the
game

Lotteries, mini-
games and more.

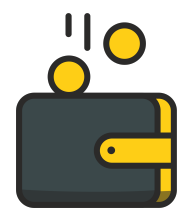

HOW TO START PLAYING

HONEYPOT GAME ?

We did the game both handy, interesting and cost-effective. To start playing, it is enough to buy an apiary and bees for Honey Token (HNY) .

You may purchase tokens at the Gaming Bank for USDT stablecoins. The HNY and USDT exchange is always available in both directions, so you can always exchange earned HNY tokens for highly liquid USDT tokens.

Create your Metamask
wallet and purchase
USDT.

Purchase HNY from
Gaming Bank.

Purchase an apiary
and some bees.

Turn your first profit

WHAT IS AN APIARY

AND WHY IS IT NECESSARY?

The apiary is where your honey bees will live and work. The purchase price of the apiary is 5,000 HNY (~\$20).

**WHEN YOU PURCHASE
THE APIARY, YOU GET
ACCESS TO:**

Bee shop

Profitable NFT

Personal NFT
Repository

Participation in
lotteries

Surprise Boxes

Affiliate program

P2P
marketplace

Economic Mini-
games

WHERE TO PURCHASE / SELL HNY TOKENS?

In the game we have set up our own bank, where you can purchase or sell HNY for USDT.

The exchange fee is 2% and can vary from 1% to 5%. The initial exchange rate is 1 HNY = 0.0042 USDT. To ensure a stable gaming economy, commission and exchange rates may be lightly regulated by game administrators.

HOW TO BUY BEES?

After buying the apiary, you have an opportunity to buy bees in the section “Store”.

In the store you can purchase a variety of bees, the main differences are
- cost, profitability and the number of hectares needed for the harvest.

Each bee needs a place to harvest. The size of the apiary is measured in hectares. By default the apiary has 10 hectares. If you don't have enough hectares to work the bees, you can still buy them at the game store.

TYPES OF BEES

AND THEIR PROFITABILITY

Buzzer

Price: 20 000 HNY (84\$)

Required hectares: 3

Basic yield: 1 600 HNY
(8% / month)

Maximum yield:
up to 6 400 HNY / month (27\$)
(up to 32% / month)

Maya

Price: 50 000 HNY (210\$)

Required hectares: 7

Basic yield: 4 500 HNY
(9% / month)

Maximum yield:
up to 18 000 HNY / month (76\$)
(up to 36% / month)

Nimble

Price: 75 000 HNY (315\$)

Required hectares: 11

Basic yield: 7 500 HNY
(10% / month)

Maximum yield:
up to 30 000 HNY / month (126\$)
(up to 40% / month)

Flicky

Price: 120 000 HNY (504\$)

Required hectares: 18

Basic yield:

13 200 HNY (11% / month)

Maximum yield:

up to 52 800 HNY / month (222\$)
(up to 44% / month)

Sweet Joe

Price: 160 000 HNY (672\$)

Required hectares: 24

Basic yield:

19 200 HNY (12% / month)

Maximum yield:

up to 76 800 HNY / month (323\$)
(up to 48% / month)

Honey Master

Price: 200 000 HNY (840\$)

Required hectares: 29

Basic yield:

26 000 HNY (13% / month)

Maximum yield:

up to 104 000 HNY / month (437\$)
(up to 52% / month)

God of Honey

Price: 250 000 HNY (1050\$)

Required hectares: 37

Basic yield:

35 000 HNY (14% / month)

Maximum yield:

up to 140 000 HNY / month (588\$)
(up to 56% / month)

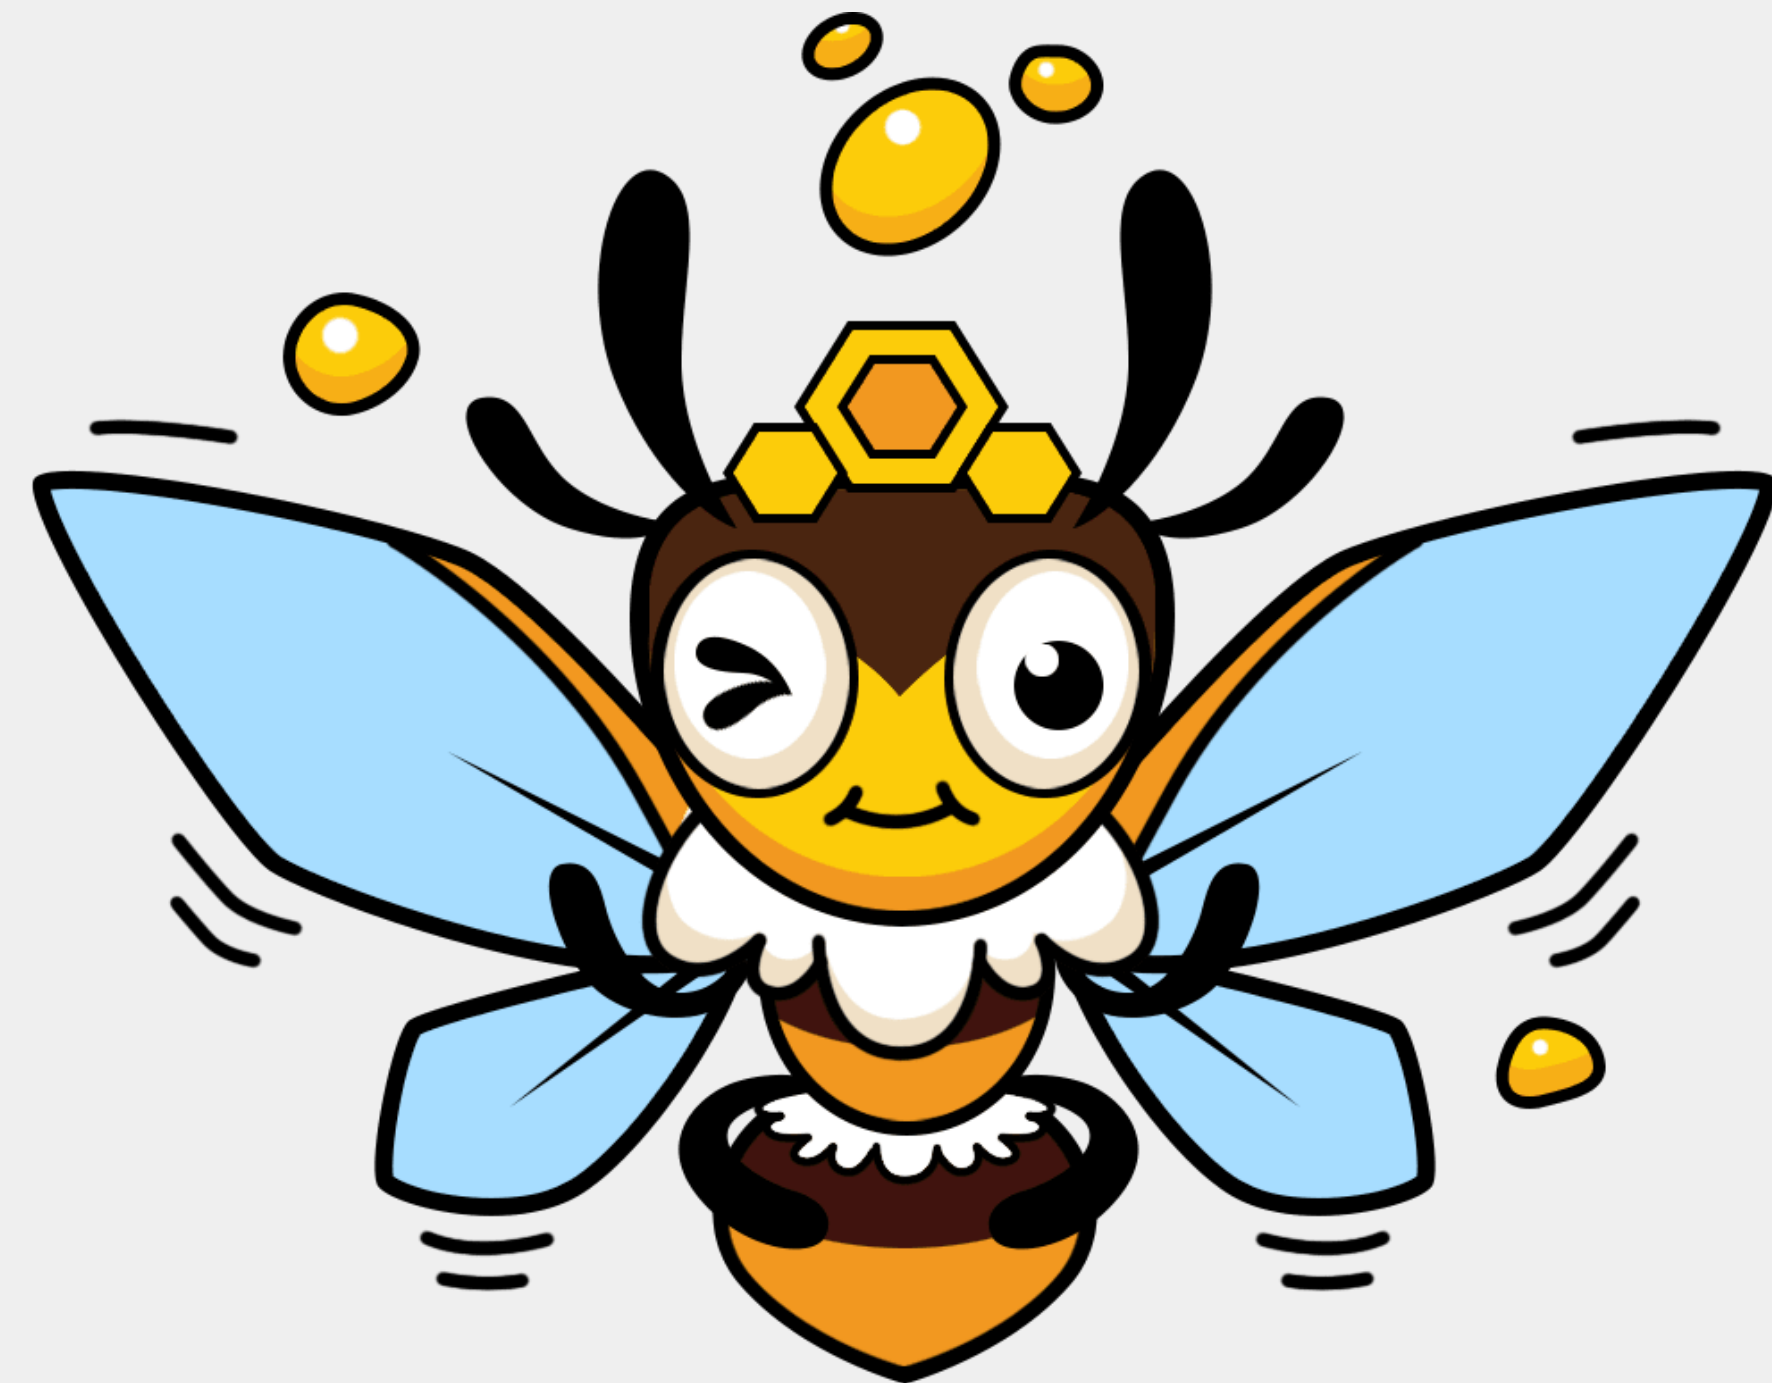

* When you buy a bee you get a basic yield, which is multiplied by 2 at 200% of mood, as well as an additional increase in profitability can be done with NFT items.

THE BEES' MOOD AND IT'S IMPACT

The mood of the bees is a multiplier of the basic yield, which can be obtained from the apiary. Mood can vary from 0 to 200%.

Each harvest from the apiary means for the bees:

- the start of the weekend, therefore within 24 hours of harvest, the yield will not be charged;
- decreased mood to 0%
- the beginning of the mood recovery process. Up to 100% mood will recover in 3 days and reach its peak (200%) - 6 days after the weekend.

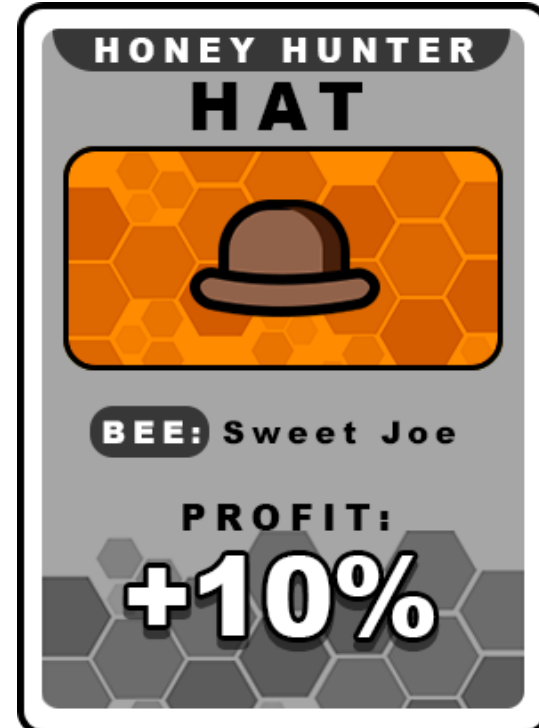

NFT STORE

At our game store, you can purchase NFT items for bees.

All items are grouped by networks (sets). Each item in the set corresponds only to a particular species of bee and gives an additional percentage of return to basic yield.

If the user has collected all 7 items from one set, then the bonus yield percentage is applied to the entire apiary.

Common NFT

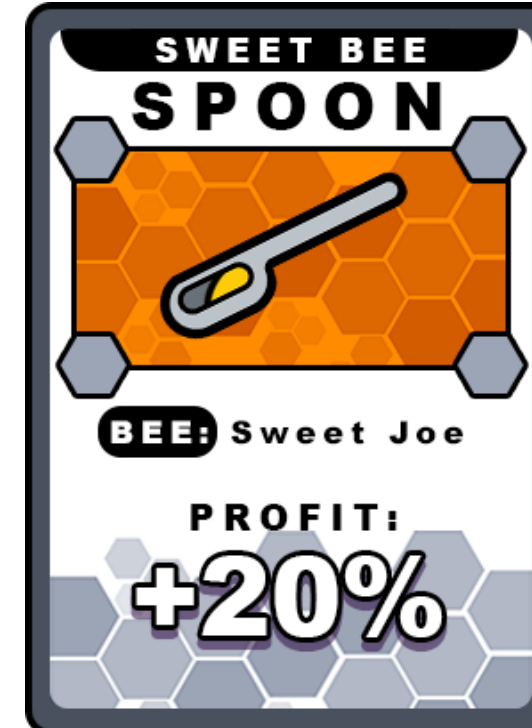

Price:

from 5 000 HNY (21\$)
to 62 500 HNY (263\$)

Item profitability: +10%

Item profitability with a complete set: +20%

Uncommon NFT

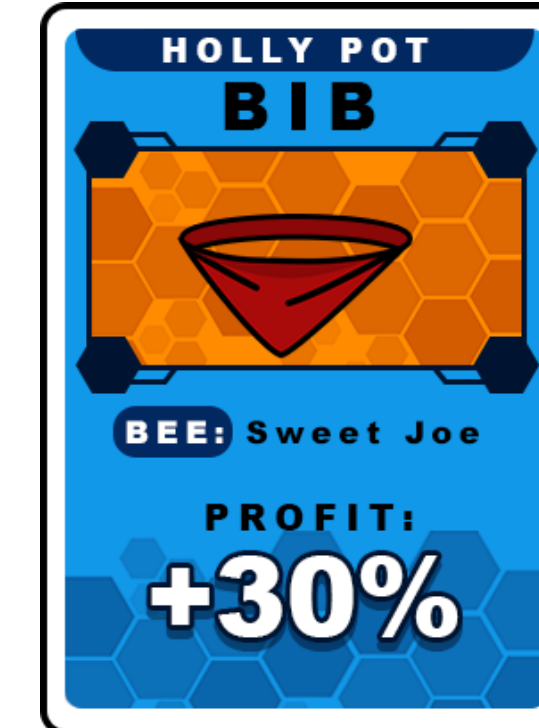

Price:

from 10 000 HNY (42\$)
to 125 000 HNY (525\$)

Item profitability: +20%

Item profitability with a complete set: +40%

Master NFT

Price:

from 15 000 HNY (63\$)
to 187 500 HNY (788\$)

Item profitability: +30%

Item profitability with a complete set: +60%

Epic NFT

Price:

from 20 000 HNY (84\$)
to 250 000 HNY (1050\$)

Item profitability: +40%

**Item profitability with a
complete set:** +80%

Legendary NFT

Price:

appears only in surprise boxes

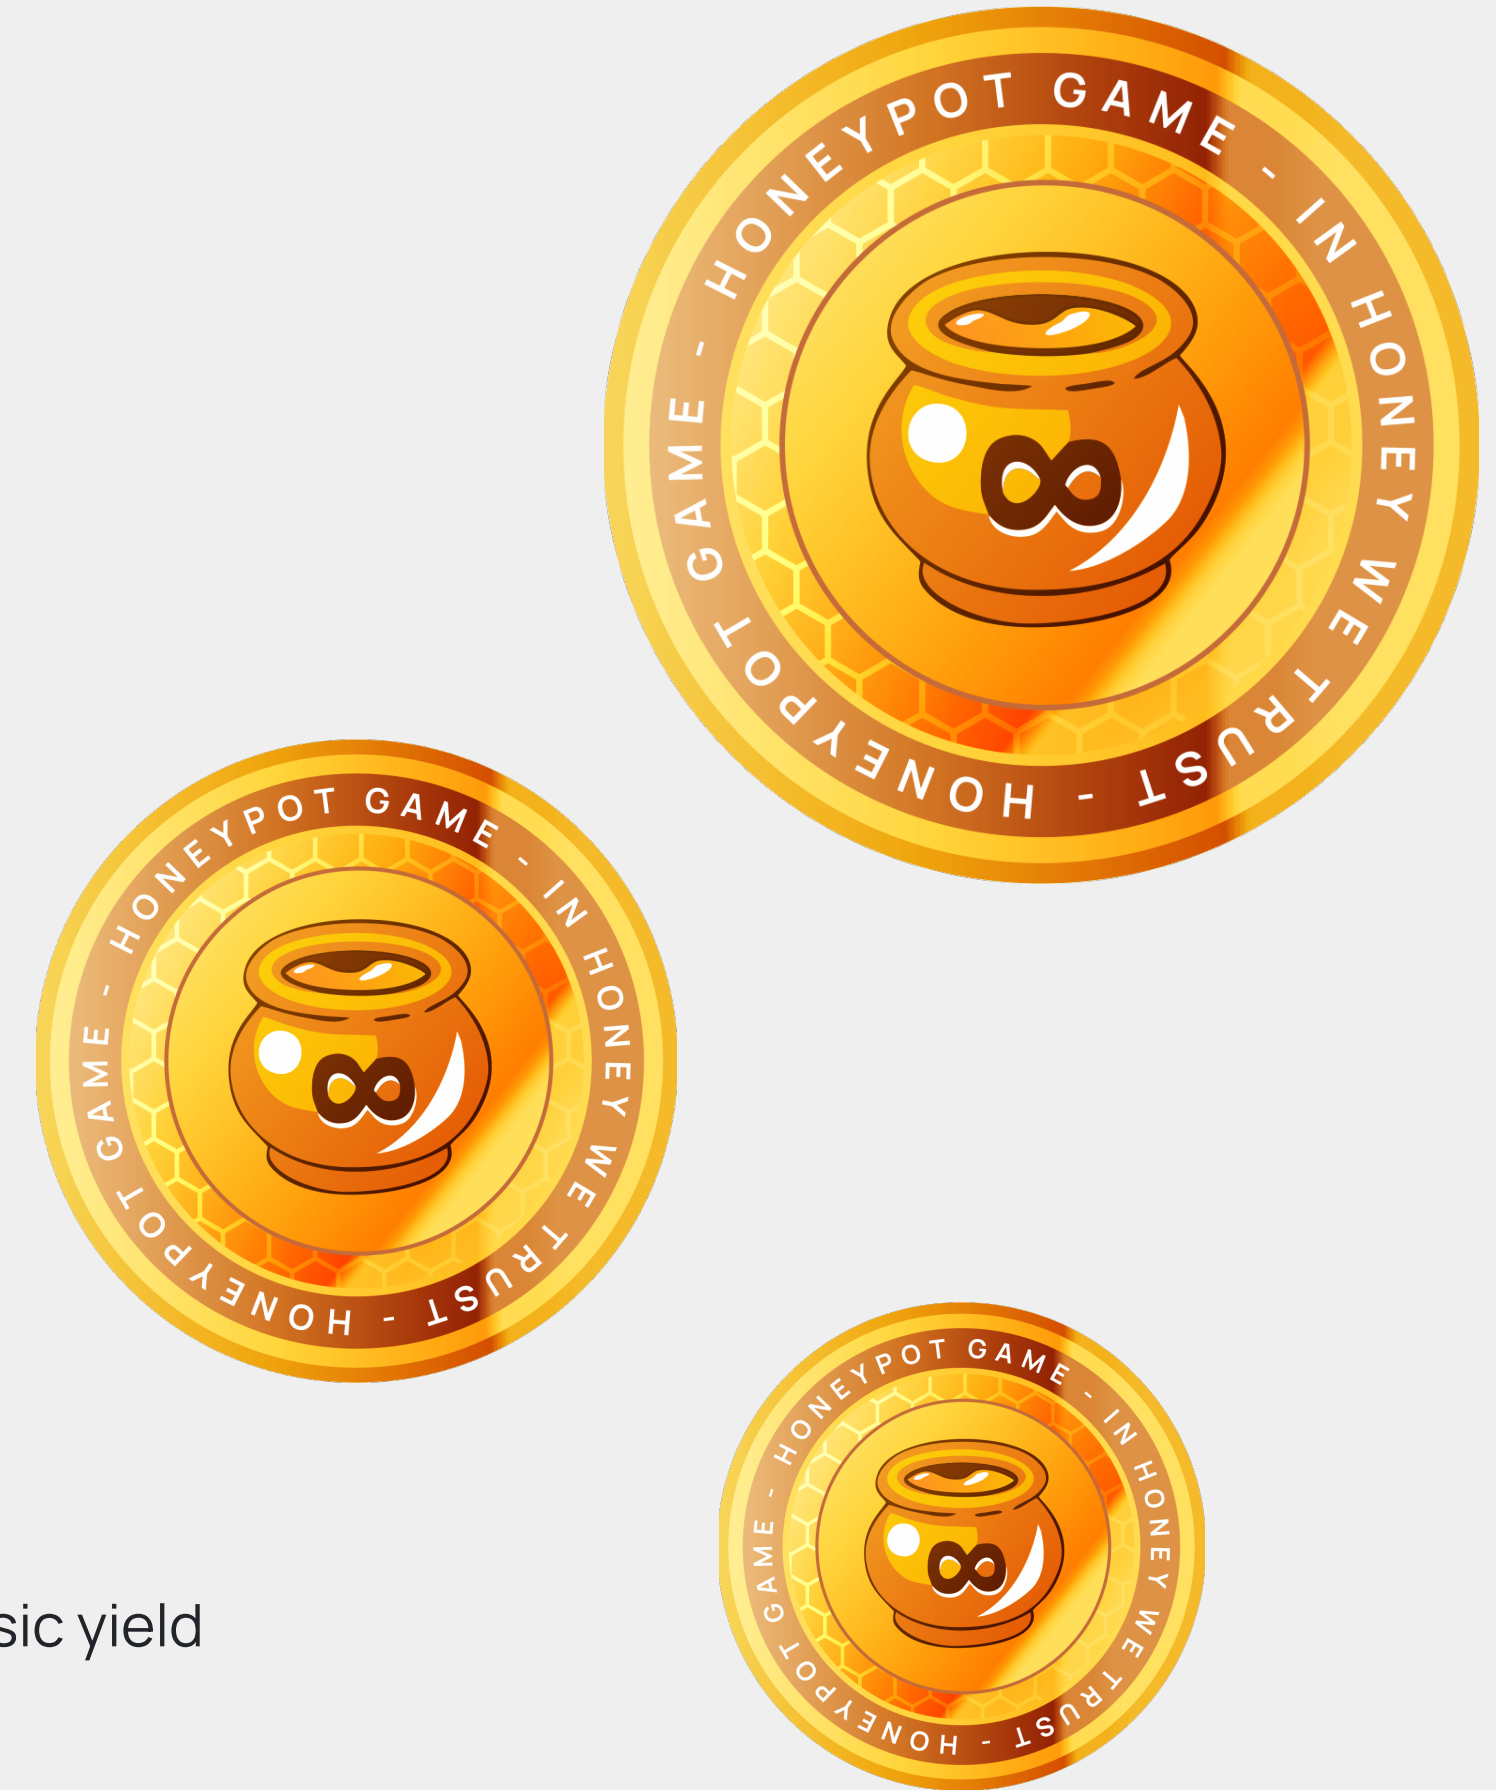

Item profitability: +50%

**Item profitability with a
complete set:** +100%

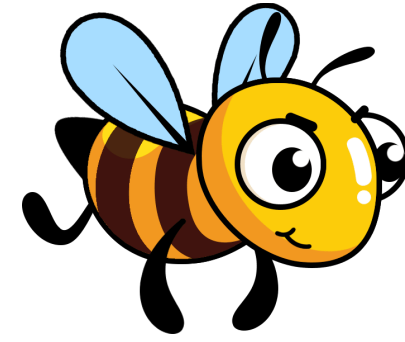

*Profitability with NFT is added to the basic yield of the bee.

For example: the bee "Nimble" has a basic yield of 10% . If you buy Master NFT (+30%), then the basic yield will increase to 13% and in the mood of 200%, the overall yield will be 26%.

*The cost of the NFT depends on how profitable it is and what type of bee it is intended for.

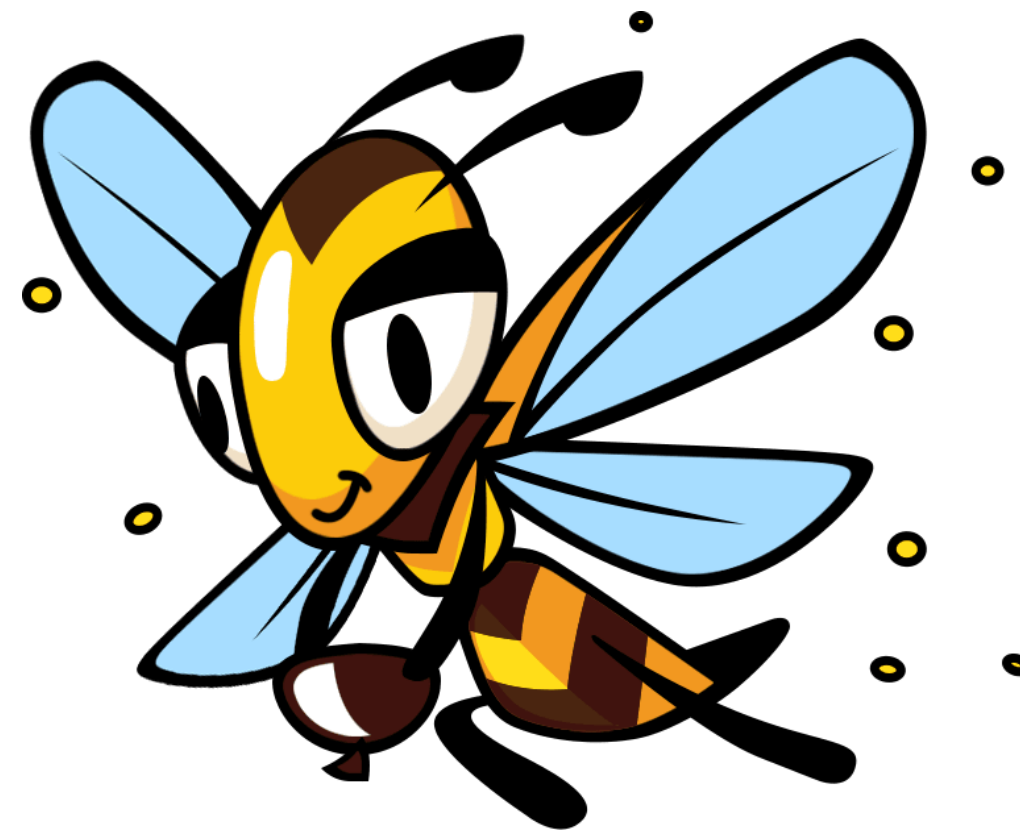

SURPRISE

BOXES

Surprise boxes will be available in the game store for those who would like to take their chances.

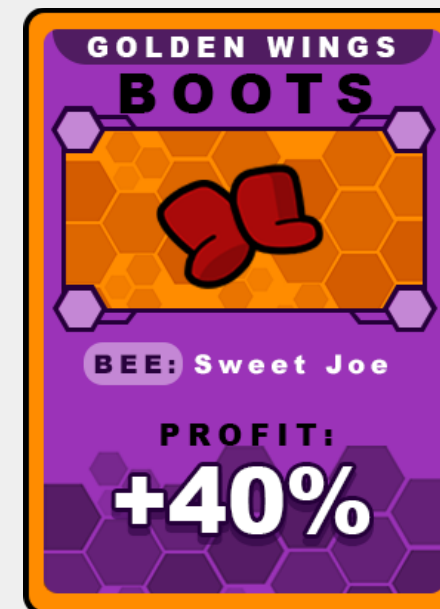

There are 3 types of boxes which vary in cost and types of surprises. In the boxes you can find HNY tokens, hectares for harvesting, bees and even LEGENDARY NFT with increased profitability, which will not be sold in the store.

P2P MARKETPLACE

The P2P marketplace is a place where users choose for how much they are ready to sell or purchase NFT items.

If you have unused NFT, or you run out of a rare item for the full collection, you can still buy/sell items, or even entire sets on the P2P marketplace.

NONEYPOT GAME

SECURITY

The game is executed on smart contracts in the Binance Smart Chain, so that data security is ensured by a decentralised BSC network

We are one of the few who care for the financial security of our players. Therefore, before starting the game, a smart contract audit is performed to eliminate the possibility of even the smallest errors in the code. The verification is performed by CertiK and the audit result will be publicly available.

TRANSPARENCY

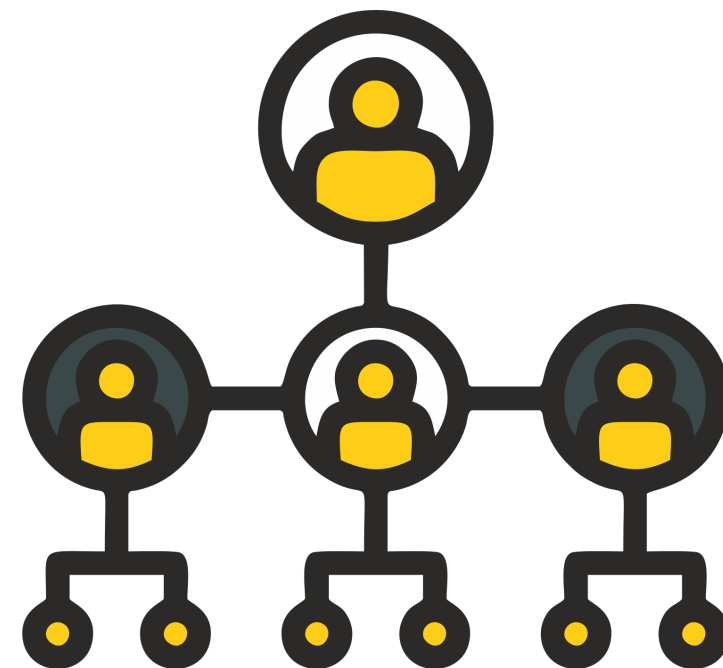

AND INTEGRITY OF THE GAME

All smart contract codes will be verified and made freely available to users.

Any player who wants to know the code and rules of the game can do it himself!

AFFILIATE PROGRAM

As part of the affiliate program, revenue is accrued from each purchase of bees and NFT items by your partners.

Each bee with NFT opens one level. If you take all seven bees and each bee has its NFT, then seven lines will open. If bees use all NFT items from the same collection, 8, 9 and 10 additional lines will be opened ``.

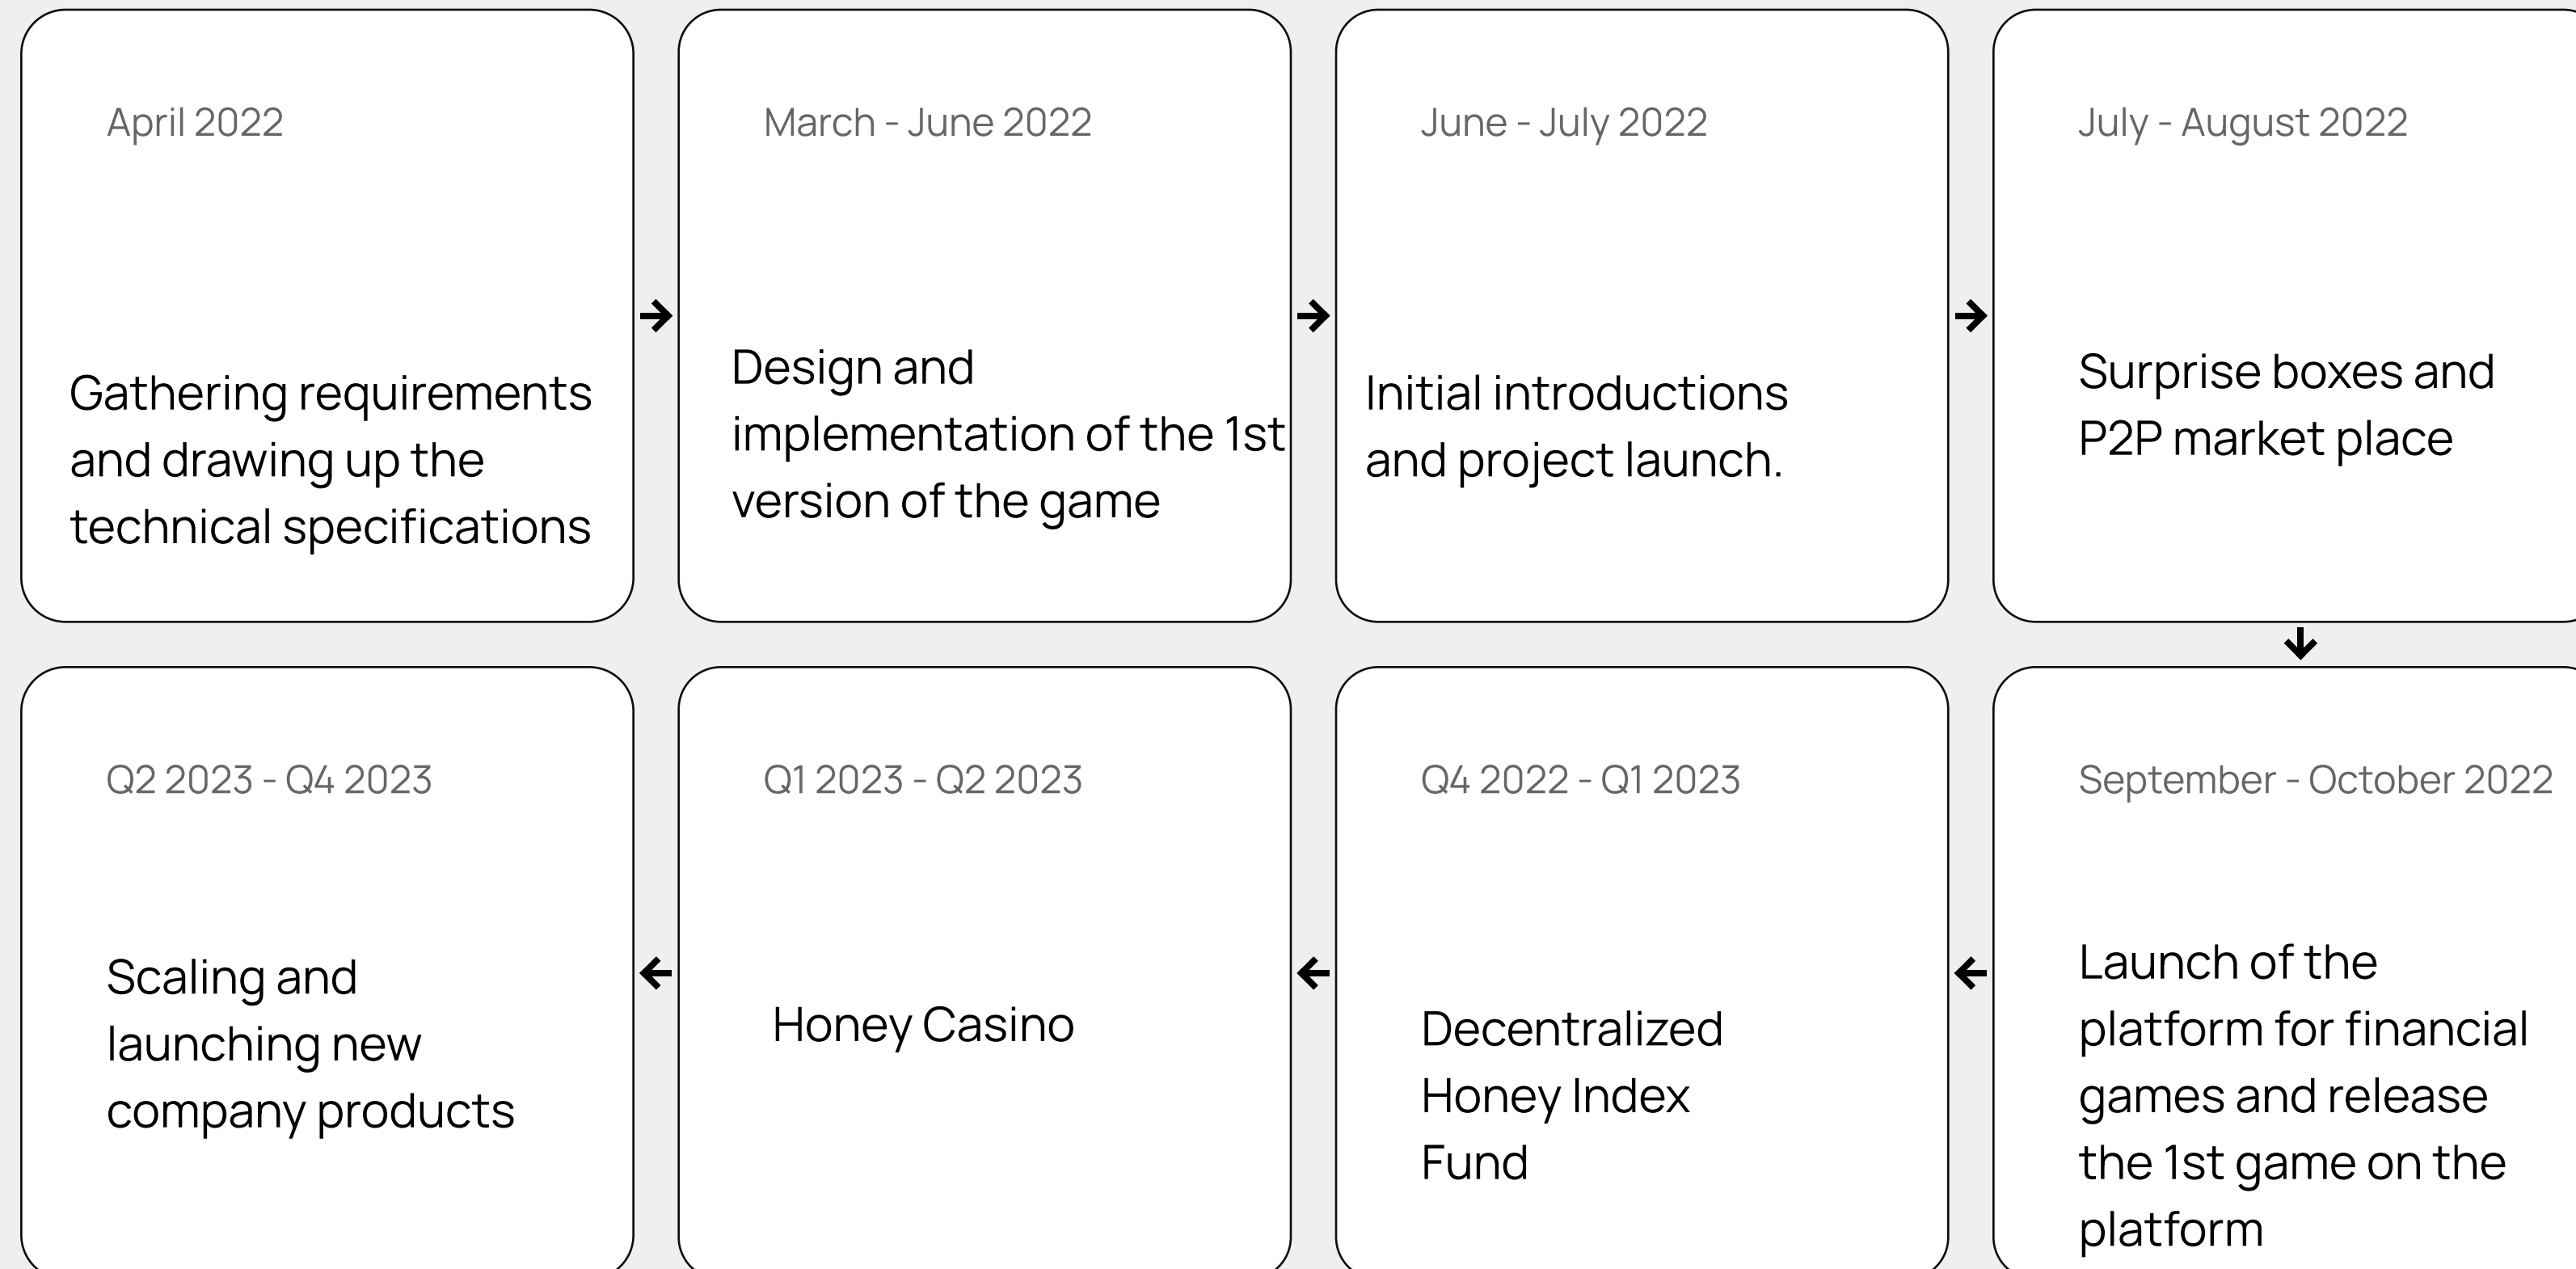

***THERE WILL NOT BE RETURN ON MISSED PARTNER REWARDS. ALL MISSED PARTNER REWARDS REMAIN IN THE GAME BANK.**
